

### Table Safe

Designed for locations where projectors are on public display for demonstration only, this security device is perfect for retail use and tradeshows. Spring-loaded locking mechanism prevents removal of projector. Projector is held securely in upright position for easy viewing. Unit can rotate 360° to show all projector features. Unique design prevents access to mounting points - both on the counter and on the projector. Includes universal projector mount assembly that works with any projector you wish to display. Available in dark gray.

PP-TBL  
Suggested List: \$199.99

### Chassis Sleeve Security System

18" steel cable. Includes:  
(1) cable looper guide,  
(1) steel chassis sleeve,  
(1) key cylinder lock.

PCB-CSL1  
Suggested List: \$39.99

# SECURITY DEVICES

### Dual-Cable Security Device

This security device's unique design secures the mounting points on the chassis as well as two of the mounting points at the ceiling or wall. Includes: (2) steel chassis sleeves, (2) aircraft-grade plastic-sheathed braided-steel cables, keyed steel lock box. Cables are routed through the steel chassis sleeves. Works with PBL projector mounts.

Adapter	Cable	Suggested List
